Manaschamaint da robots

Da che's tratta que?

Robots faun adüna be que che chi vain dit ad els. In quist exercizi giuvals vus robots. Vus imprendais a ramasser cumands adattos, cha vus mettais zieva insembel a successiuns, eir numno programs. Vus imprendais eir a ler ed exeguir tels programs.

Materiel

- forsch
- assa da giuver cun muostras da taglier pels cumands
- figüras da gö

Cumands

Trais exaimpels da cumands:

Fo ün pass inavaunt!

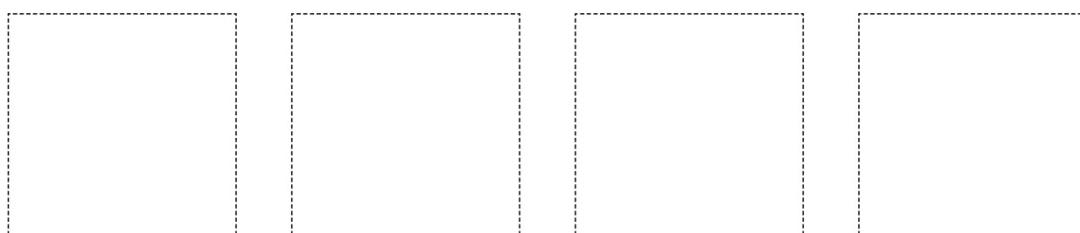

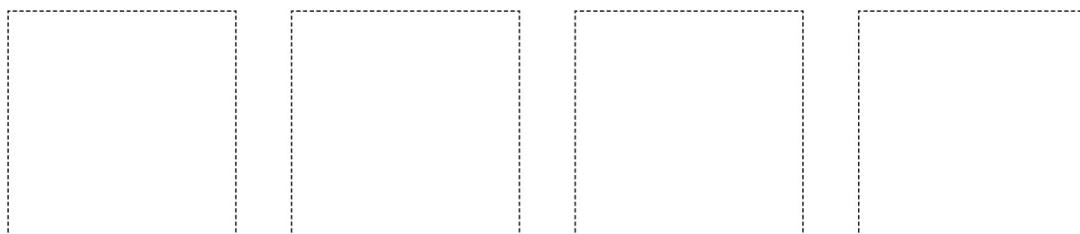

Volva't per 90° a schnestra!

Volva't per 90° a dretta!

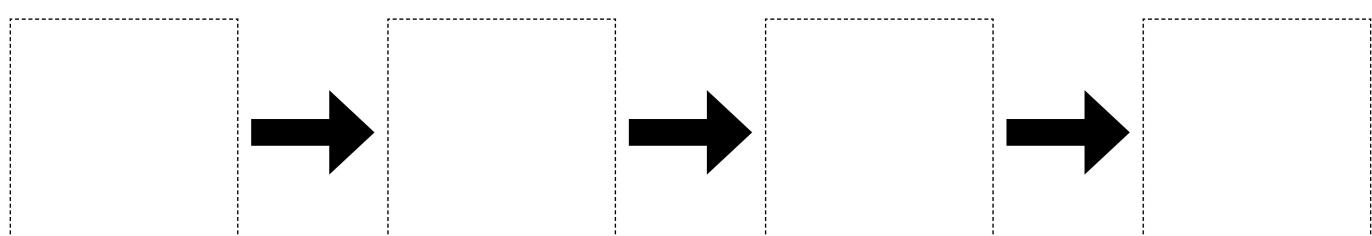

1. Tschercha da cumands

Tschercha uossa ulteriurs cumands per pudair muvanter il robot i'l spazi e disegna'ils aint ils quedrins.

2. Fila da cumands

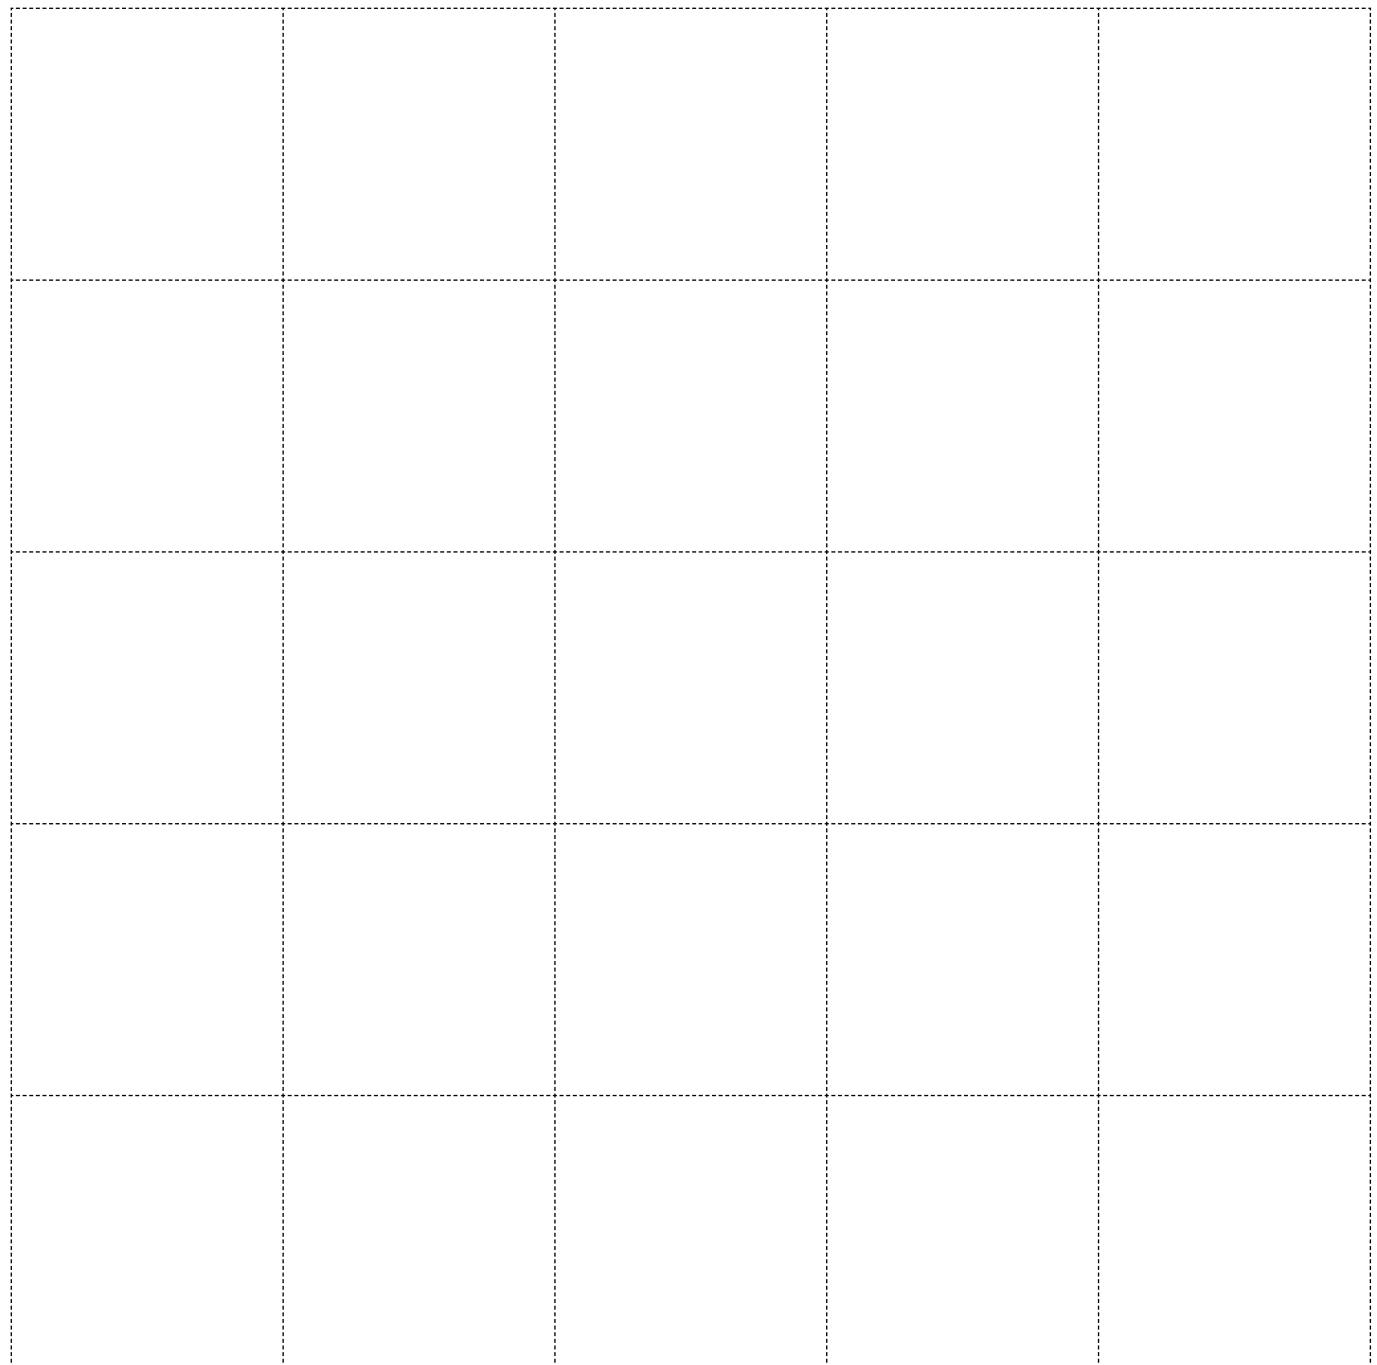

Be cun ün cumand nu riva il robot fich dalöntsch. Uschè po'l be fer ün pass u üna vouta. Prouva uossa da metter in fila ils cumands.

Che hest tü observo? Do que cumands chi impedeschan il manaschamaint dal robot?
Do que cumands, cha tü hest drubo püssas voutas?

3. Assa da giuver

Chi riva da chatter la via la pü simpla al böt culs cumands disponibels? Drouva per fer que ils simbols da cumands ed ils obstaculs sülla prosma pagina.

Taglia our ils seguaints simbols da cumands e definescha, inua cha la partenza ed il böt dessan esser süll'assa da giuver. Metta uossa ils duos obstaculs in via. Chi chatta la pü simpla via al böt?
